

RISER SYSTEM

This isometric view shows the completed assembly. The structure consists of a base plate with a 2x4 Technic brick attached to its right side. Two vertical Technic axles are mounted on the base. The left axle is topped with a 1x2 Technic plate and a 1x2 Technic brick. The right axle is topped with a 1x2 Technic plate and a 1x2 Technic brick. A horizontal Technic axle is mounted across the middle of the two vertical axles, with a 1x2 Technic plate and a 1x2 Technic brick attached to its ends. The entire structure is built using white Technic components.

ASSEMBLY + MOUNTING

STEP 1

Install the risers into the base starting with the longest riser first then working your way to the smallest riser. It is easiest to lay the 1,2 or 3 tier base flat on a hard surface then push in with a gentle pressure.

TOOLS REQUIRED FOR ASSEMBLY

SMALL PHILLIPS SCREWDRIVER

STEP 2

Once all the risers have been installed you can now choose which chassis mount you want to install on the individual risers.

Starting with the topmost riser install the chassis mount using the included 3mm screws with a small phillips screwdriver (Not Included).

Continue installing the other chassis mounts of your choice using the same method.

STEP 3

After installing all of the chassis mounts, place your desired LEGO vehicles on the riser stands in the configuration of your choice.

Observe the vehicles on the riser stand from a front perspective to see if the center of the vehicles align properly with each riser.

If the vehicles are not centered on the riser stand, you can remove them and loosen the screw slightly allowing you to shift the chassis mount left or right to properly center the vehicles. Once you have the desired shift, tighten down the screw.

SPECIAL ASSEMBLY REQUIRED

LEGO sets number (76922: *BMW M4 GT3 & BMW M Hybrid V8 Race Cars*) and (76916: *Porsche 963*) require several extra LEGO bricks (NOT INCLUDED WITH PURCHASE OF RISER SYSTEM) in order to properly center the vehicle using the baseplate chassis mount.

The sets require x2 LEGO (1x3) plates and x2 LEGO (1x4) plates in order to center the vehicle properly. See the **red highlighted areas** in the photos for proper placement.
